

PE#DESIGN11

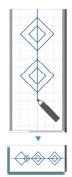

PE-Design 11 – the versatile all-in-one embroidery and sewing digitizing software

Packed with powerful and timesaving features, this software is for both the casual hobbyist and the home-based business*. Imagine the capability to create your own fonts, stitches and designs – just once – to use many times on hats, pillows, shirts, and other fonts.

Reduce the amount of time spent changing threads by using the Intelligent Colour Sort feature, which will stitch those areas that share one colour in groups.

Advanced Layout and Editing Features

- 130 fonts with font filter: Filter by type of font to narrow down font choices
- Convert thread palette of existing design to colour palette of choice
- Over 1000 built-in designs: See a preview of the designn before you stitch
- Font mapping: Map your favourite fonts to use as easily as built-in lettering
- Stitch Design Factory: Create and save your own decorative sewing stitches, up to 100mm wide**
- **Updated thread chart:** Choose from additional thread colours from existing brands, or choose from two new brands of threads.

Font Mapping

More Powerful Quilting Functions

- Automatically remove background from embroidery designs and quilt with echo fill, decorative fills, stippling and cross-hatch quilting stitches
- Decorative Fill Patterns: Ceate your own with programmable stitch creator, or choose from the 54 built-in decorative fill patterns to use as standard or background fill stitches
- Echo Quilting: Fill your block with a radiating quilting method to follow the curve of your decorative image
- Fill Pattern Editing: Additional fill patterns are included, with more flexibility to customise decorative fills such as random shift function that distorts the original pattern for unique fills.

- * Certain pre-loaded licensed images are for personal use only.
- ** Choosing a stitch width of 100mm may affect stitch quality.

Already own PE-Design 10?

Upgrade your existing software to receive enhanced capabilities and added features! Ask your dealer about the PE-Design 11 Upgrade.

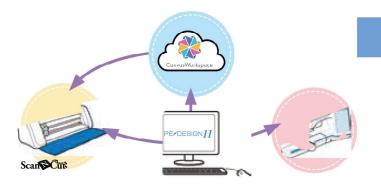

Enhanced Image Tracing for Photostitch and Auto Punch

• Photostitch, Auto Punch and Cross Stitch Wizards for enhanced image tracing create a more accurate image tracing output.

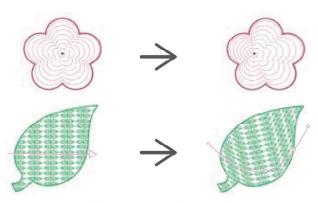

Compatibility with Scan Cut

- Import FCM files to create embroidery designs
- Create FCM files to send to CanvasWorkspace or directly to a wirelessly-enabled ScanNCut machine.

Ultimate Customisation and Design Tools

- Intelligent Colour Sort helps reduce the amount of time you spend manually matching colour segments and the time at your machine to change threads
- The fabric selector automatically adjusts the sewing attributes for your embroidery based on your fabric selection
- Round and flexible spiral stitches add motion and dimension to your embroidery shapes, and stitches can be set to follow the shape of your embroidery or stand out to give you a 3-dimensional effect

Flexible Spiral Stitch and Stitch Direction

Enjoy the New and Enhanced Features of PE-Design

Minimum PC Requirement

Operation System: Windows 7/8.1/10

Processor: 1GHz or higher

Memory: 1GB or more is recommended

Hard disk free space: 600MB Monitor: XGA (1024 x 768), 16-bit colour or higher Port: 2 available USB

Internet access: Required for upgrade

Package Contents

Embroidery Threads*

* Optional purchase required
